

Assessment 1 Instructions

[ITO5002-TP5-26/Assessments/1. Presentation/Assessment 1 Instructions](#)

Assessment 1: The pitch report and presentation

Word/Time limit: :

- **Informal report or similar:** Max 1000 words (+/-10%) to structure and inform your presentation (this not graded, but for your practice to help with critical thinking) and must be submitted
- **Live and recorded presentation to an industry panel:** 10 minutes (this will be assessed)

Weighting: 30%

Individual/Team: Team

Teamwork

In order to ensure that team members are rewarded appropriately for their contributions, an individual team member's final mark for those assessments can vary based on defined criteria across the teaching period. Students will be required to complete a confidential self and peer assessment of their teamwork at the end of the unit. Peer assessments require maturity, responsibility and honesty. Your OLA will provide further details on this peer evaluation in Week 4

After you have read this information, head over to the Assessment 1 Q&A discussion forum in Ed to ask any questions and see what your peers are saying about this assessment.

Assessment overview

In order to ensure that team members are rewarded appropriately for their contributions, an individual team member's final mark for those assessments can vary based on defined criteria across the teaching period. Students will be required to complete a confidential self and peer assessment of their team work at the end of the unit, Peer assessment's require maturity, responsibility and honesty. Your OLA will provide further details on this peer evaluation in week 4

This piece of assessment is a report plus a presentation describing a problem space that you have discovered, with a proposed solution. The report will serve as a base for your presentation and help structure your ideas for your formal presentation. It is not assessed but must be made available for your OLA.

The presentation will be videoed. This problem space and solution will be presented to an industry panel of IT professionals and recorded for your OLA.

This is the first part of your team assessment to develop an artefact based on these ideas, that could be useful to the community (a problem solved, a challenge met) focussing on IT for Social Good. The audience for your final artefact is up to you. It could be a researcher, a government department, or the general community—an audience to which your artefact will make sense. This artefact will be based on publicly available data. You should carefully consider the deliverables required for [Assessment 2: Iteration 1 and 2](#) when you select your project.

In this assessment you will have the opportunity to show that you can, as a team, critically enquire and create innovative solutions informed by research into topic areas and relevant open data, using problem-based learning and developing problem-solving. It will show that you can document your ideas and that you understand the importance of communicating solutions to specific audiences and of course it will give you practice at summarising, presenting and taking on feedback skills. This is the culmination of your learning in Modules 1 and 2. You will end up having a document that you will pitch to negotiate with a possible non-IT sponsor and other IT stakeholders to reach an agreement on the proposed project. In this instance, you will pitch to a panel of industry experts.

Watch the following video [01:05] to learn more about this assessment's expectations before moving on to the assessment details:

ITO5002_MA.1_Assessment 1 overview

Assessment 1 overview courtesy of Gail Bourne and Najib Al Chamaa

This assessment supports unit learning outcomes 1, 2 and 3.

Assessment details

In this assessment, you will pitch (also known as showcase) to a panel of industry experts and your peers explaining and justifying your team's proposed project. A copy of your presentation slides and your report will be submitted to Moodle. However, it is the recorded video of your presentation to industry experts that will be assessed and will also be submitted to Moodle.

You will present your ideas in a 10-minute presentation to an industry panel. This will be recorded. The form of this presentation is flexible. It could be a PowerPoint, an animated movie, or a short film with voiceover. The presentation should be designed to showcase your problem space and your solution—the who, why what and the so what.

The audience: Assume a possible sponsor who will find your final artefact of benefit. In this instance, you will present to a panel of industry experts and your OLA who will give you feedback. You will use the deliverable to inform the panel and our OLA of what the project is. The OLA and the panel will use the deliverable to help check that the scope of the artefact is reasonable and that the work performed in this

proposal is of appropriate quality, quantity and of use and relevant (to UN goal).

Work through the following steps to complete this assessment:

Step 1: Select a suitable issue of interest

Select a suitable issue of interest from the UN [Sustainable Development Goals](#) (United Nations, 2022).

Work with your team, look at your strengths and negotiate an issue from the UN goals, where you can see something useful that needs to be done. Practise all your learnings so far (i.e. ideation) to think of something innovative and clever, something that would be of use to and benefit a particular audience.

Step 2: Conduct further research

Conduct further research into the issue, use the following as a guide:

Access websites, open data, and news items concerned with that particular goal. Look for open data that you can use to get hindsight, insights, and foresight to assist you in defining a problem space that could be helped by an artefact that you as a team develop. Review previous modules and apply knowledge gained throughout this step. Be prepared to change your ideas as you discover more through applying practices from Module 2. The following points will be helpful to keep in mind for this step:

- identify useful open data sources (Use of at least 2 datasets, and WebScraping is not allowed)
- identify the key stakeholders (who will benefit from what you intend to develop)
- outline concerns/problems and why they are important (your problem space)
- outline what you intend to do (your solution space) and how it will help and the rationale behind it
- iterate (repeat these steps) until your team has agreed on what you are going to create.

Step 3: Prepare project proposal

So how do we know what you propose to do, how do we know what you will end up with, how can we tell if it's a good idea or not, how can we tell if you have been successful? Details such as who, why what and the so what?

You must be prepared for change by:

- developing a written proposal (to match your pitch below) to build your presentation from
- developing a problem statement
- developing an ethics canvas.

Submit your report by 11.55pm AEST Tuesday Week 3

Step 4: Prepare the pitch

Prepare your presentation. All team members must speak.

- introduction—who you are and what you are going to discuss
- define the goal you chose and why your team chose it
- give a short description of the issue, and use news items, and things you have discovered
- problem statement/challenges (problem space)
- proposed solution that could help solve the problem—what to expect from this project
- identify the key stakeholders (who will be affected and how)
- Epics/Wireframes to show how the stakeholders could use your solution
- outline any system architecture you plan to use (remember, it's a non-IT audience)
- describe open data sources you have used

- consider who might be a potential sponsor of your artifact and why
- conclusion—what you have discussed over the last 10 minutes
- any references used to form your views in your presentation
- ask for feedback.

Step 5: Submit your presentation

You are required to submit your video presentation as a video link using the Assessment 1 submission point. To do this, you will first need to upload your video to your Google Drive using your Monash student login. You will need to make sure that it is accessible to your OLA. Select to expand the following instructions to help you prepare your video for submission.

[Uploading and sharing your video on Google Drive](#)

Submit your presentation by Tuesday, Week 3, at a time to be agreed with your OLA.

Submission details overview

Report:

Your report will be submitted directly to the relevant submission point on the Assessments overview page.

Live and recorded presentation to industry panel:

You will need to submit a link to your video presentation in the relevant submission point on the [Assessments](#) overview page. To do this, you will first need to upload your video to Google Drive. Then, you can either share the link directly in the submission point or paste it into MS Word and submit it in a document.

You will need to make sure that it is accessible to your OLA. The instructions in Step 4 will help you prepare for the submission of this assessment.

Submission status

Your assessment MUST show a status of '**Submitted for grading**' before it will be marked.

If your submission still shows a status of '**Draft (not submitted)**', it will **not** be assessed and will incur late penalties after the due date/time.

Assessment criteria

1. Definition and description of problem/challenge and background.
2. Definition and description of the proposed solution—A convincing argument and rationale (value statement) of how the proposed solution will help.
3. Who (personas/target audience that would use this solution), and a possible sponsor.
4. Iteration 1 plan—showing what will need to be completed.
5. Presentation skills, clarity, referencing, grammar and spelling.
6. Teamwork.

Your work will be assessed using the following marking guide:

Assessment 1 marking guide

Criteria	No Pass Less than 50%	Pass 50–59%	Credit 60–69%	Distinction 70–79%	High Distinction 80–100%
Definition and description of problem/challenge and background (25%)	No perspective or little analysis applied. The problem/opportunity defined is vague or not precise OR Does not fall under the chosen goal but might with a small pivot. OR Little evidence of research as the statement is too generic or vague.	Satisfactory analysis. The problem/opportunity the team has defined may be meaningful, actionable, and falls under the chosen goal but it is not quite clear if this is a real problem / opportunity to solve, with a pivot. Research conducted with some understanding of the problem/opportunity.	Demonstration of fundamental knowledge, skills, and attributes at a proficient level of analysis. The problem/opportunity the team has defined is meaningful, actionable, and falls under the chosen goal. Research conducted with some understanding of the problem/opportunity.	In-depth analysis. The problem/opportunity is well defined/meaningful, actionable, and falls under the chosen goal Research conducted with a deep understanding of the problem/opportunity.	Exhibits rigorous critical analysis. The problem/opportunity is well-defined, meaningful, actionable, and falls under the chosen goal. Research conducted with a deep and extensive understanding of the problem/opportunity.
Proposed solution (25%)	Limited or no explanation or link between the solution or problem. OR Does not fit the defined target audience.	Minimal explanation or exploration of proposed solutions or does not fit the defined target audience.	Good understanding of how the proposed solutions will assist in helping with the problem, some details are lacking. The proposed solution is desirable and relevant to the target audience.	Mostly detailed on how the proposed application will solve this problem, with some level of details on how the application will solve the problem. The proposed solution is desirable, feasible and relevant to the target audience.	Comprehensive, well-defined, desirable, feasible, and innovative functions of how the proposed application will solve this problem. It is clear how the application can solve the problem.

Criteria	No Pass Less than 50%	Pass 50–59%	Credit 60–69%	Distinction 70–79%	High Distinction 80–100%
Who (personas/target audience that would use this solution) and possible sponsor (20%)	Vague OR little to no link to the problem statement. Unsatisfactory amount of research demonstrated. OR Needs/ expectations are vague, target audience too vague or too wide. (Lots of different audiences) OR Little to no goals or values.	Doesn't exhibit an acceptable understanding of their target audience through persona definitions. OR Does not identify needs and expectations. OR Mostly describes real people with backgrounds, goals and values. Although target audience is wider than it should be and not very specific.	Exhibiting a proficient understanding of their target audience through persona definitions. Identified major needs and expectations. Mostly describes real people with backgrounds, goals and values and target audience is specific, focused and narrow.	Exhibiting a superior understanding of their target audience through persona definitions and a pertinent empathy tool. Identified major needs and expectations. Mostly describes real people with backgrounds, goals and values and target audience is focused and narrow. (One specific audience).	Exhibiting an exceptional understanding of their target audience through persona definitions and use of various, pertinent empathy tools. Well-defined and specific. Focuses on major needs and expectations of the target audience. Describes real people with backgrounds, goals and values. Target audience is specific, focused and narrow. (one specific audience).
Iteration 1 plan (10%)	Low level of analysis completed to determine what is required. OR Shows no understanding of requirements.	Satisfactory analysis of what is required. OR Shows very little (but some) thought of what is required in determining the successful implementation.	Proficient analysis/critical evaluation of what is required.	Shows superior analysis and evaluation of what is required in determining the successful implementation.	Shows exceptional analysis and evaluation of what is required in determining the successful implementation.
Presentation skills (10%)	Vague or little explanation of the problem statement, solution and audience.	Some explanation of the problem statement, solution and audience. However incomplete or not well explained.	Satisfactory articulation of the problem statement, solution and audience.	Well-explained and detailed articulation of the problem statement, solution and audience	Excellent explanation of the problem statement and solution. Deep insights into the audience for the solution and their challenges.

Criteria	No Pass Less than 50%	Pass 50–59%	Credit 60–69%	Distinction 70–79%	High Distinction 80–100%
Teamwork (10%)	The team clearly has not worked together. Either a disjointed presentation or the work of just one person.	Evidence of a lack of coordination and cooperation.	Evidence that the team has worked together to prepare the presentation.	Good communication and cooperation amongst the team members.	The team has clearly achieved a result that has leveraged the strength of all the members. Excellent communication among the team during the presentation.
